

The patented Sentry Mirror system resists graffiti, minimizes vandalism and eliminates the dangers of shattered glass. It reduces the high cost of constantly repairing or replacing restroom mirrors, minimizes exposure to insurance claims/lawsuits and helps maintain a clean, attractive environment for customers.

The patented Sentry Mirror is a commercial-grade, standard-sized, self-contained mirror that is protected behind a clear, replaceable Plexi-Shield.

Who needs Sentry Mirror

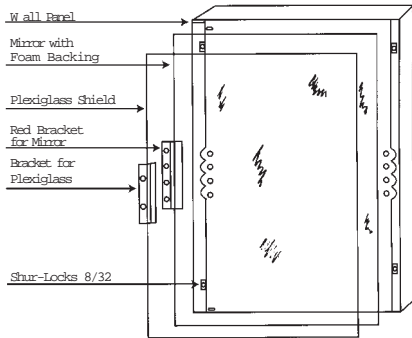

This retrofit and new construction solution to mirror vandalism is just right for any high traffic restroom location:

- Retailers and Restaurants
- School and Public Facilities
- Parks and Recreation

Industry Business-to-Business Suppliers:

- Restaurant, Construction and Janitorial Suppliers

PRODUCT FEATURES

[20" x 30" x 1/8 Seamed Edge Mirror with Foam Backing
20" x 30" x 3/32 Plexiglass Shield]

■ **FRONT BEZEL** (picture frame cover)
Manufactured from a single piece of #4 polished stainless steel with no mitered or welded corners and no points of weakness.

■ **WALL PANEL** (mirror casing)
Manufactured from a single piece of corrosion-resistant aircraft-quality aluminum alloy with no mitered or welded corners. The panel will not rust and has no points of weakness.

■ **MIRROR**
Made from the highest quality DS-Clear mirror with swiped edges for protection. There is no distortion as with plastic mirrors.

■ **POLYETHYLENE FOAM BACKING**
Pressure-sensitive adhesive protects the entire back of the mirror and acts as a cushioning material to prevent breakage. Broken mirrors are held intact for easy, safe removal and replacement.

■ **MOISTURE / DUST SEAL**
Provided around the entire periphery of the mirror using 3M ScotchFoam closed-cell vinyl foam tape. A barrier is formed between the glass mirror and the Plexi-Shield.

■ **PLEXI-SHIELD**
Cut from 3/32" thick clear acrylic sheet with PVC protective film on both sides to prevent scratches prior to installation. The shield is strong and arrives scratch free.

■ **BRACKETS**
Provided for removing the Plexi-Shield and the

mirror. Mirror brackets have been anodized RED to distinguish the mirror fastening device from the Plexi-Shield fastening system. Plexi-Shield and mirror removal and replacement are simple.

■ **TAMPER-PRUF® SCREWS**
Provide direct front access to Plexi-Shield and mirror. It requires a special tool, provided with the mirror, for removal. Screws have been made captive using snap rings and are a permanent part of the front stainless steel bezel. Eliminates theft, loss, or parts falling down a drain.

■ **SOCKET and SCREW ASSEMBLY TOOL**
Provided with the mirror for easy access.

■ **PAPER TEMPLATE**
Provided with the mirror for ease of installation. Template is taped to wall to indicate location of anchor bolt holes.

■ **PACKAGING**
Individual mirror is packed in its own specially designed corrugated carton. Twenty boxed mirrors are packed in a triple-wall corrugated container and palletized for undamaged arrival to any destination. Product arrives undamaged and ready for use or resale.

■ **PRODUCT GUARANTEE :**
The product is backed by a limited lifetime warranty that covers the front bezel (picture frame cover) and the wall panel (mirror casing). All other parts are available for replacement through Sentry Mirror Sales.
